

Minor in Education

Purpose

A minor in Education provides students with both a solid introduction to the field and a good overview of the basic theory and scholarship of the discipline.

Students who complete this minor will make focused observations of children or adolescents in k-12 classroom settings, explore theories of learning and development, and think critically about the origins of contemporary educational policy and practice.

The minor can be accomplished with courses delivered on-campus, online, or in any combination of modes to meet student needs.

How Can a Minor Contribute to My Career Success?

A minor in education provides a foundation for further preparation as a teacher, and in related fields such as curriculum development, psychology, child advocacy, social work, and counseling.

Credits Required: 18

Steps to Declare a Minor in Education

1. Review the current academic bulletin for USCB policies related to minors.
2. Consult with your academic advisor.
3. Declare your minor by completing this [form](#) located on the USCB Registrar webpage.
