TEACHING EXPERIENCE

Fundamentals of Nursing

Tasks

- o Educated first-semester nursing students on the development of beginning technical competencies in the application of the nursing process to assist in meeting the needs of selected patients of varying ages.

Common Health Problems

Tasks

- o Facilitated the utilization of the nursing process to assist in meeting the needs of patients with common health problems in a medical-surgical learning environment in the classroom and clinical setting.

Pharmacological Therapies

Tasks

- o Coordinated and facilitated classroom education on the advanced study of the role of the nurse in the safe and effective administration of medications.

Intravenous Therapy

Tasks

- o Coordinated and facilitated the principles and practices of intravenous therapy in the classroom and lab setting. An emphasis was placed on venipuncture techniques, complications, fluid balance, and the responsibilities of a licensed nurse.

Complex Health Problems

Tasks

- o Coordinated and facilitated in the classroom and clinical setting the expanded application of the nursing process in meeting the needs of patients with complex health problems.

Nursing Care of Children

Tasks

- o Facilitated the application of the nursing process to assist in meeting the needs of children with acute and chronic health problems while focusing on growth and development and anticipatory guidance.

Management of Patient Care

Tasks

- o Coordinated and facilitated in the classroom and clinical setting, nursing care of small groups of patients utilizing the nursing process and concepts of management.

Nursing Seminar

Tasks

- o Coordinated and facilitated the exploration of concepts related to selected nursing topics.

ADMINISTRATIVE EXPERIENCE

- Responsible work experience in health care administration as Interim ICU Director, financial analysis, budgeting, reimbursement, accounting, and chart auditing.
- Knowledge of operational principles, business processes, policies, practices, technology, and regulations. Extensive knowledge of clinical and operational decision-support information systems.
- The ability to collaborate with appropriate departments/services, staff members, and physicians when appropriate.
- Participates in Process Improvement teams as needed.
- Assists in the development of infection control-related policies, procedures, and educational programs to comply with local, state, and federal regulations, the Joint Commission standards, and guidelines and distributes pertinent information as appropriate.
- Actively participates in the role of preceptor for student nurses, nurse interns, and graduate and experienced nurses and assists with the development of new preceptors in their role.
- Mentors serve as role models for staff who are seeking continuous learning through formal education and the development of others.
- Serves as a leader supporting hospital administration by identifying and resolving patient and staff-focused opportunities for improvement.
- Involves staff and key stakeholders to achieve optimal patient experience and efficient hospital throughput.
- Uses appropriate interpersonal styles and techniques to gain acceptance of ideas or plans; modifying one's behavior to accommodate tasks, situations and individuals involved
- Demonstrates good judgment and analytical ability to oversee and coordinate patient placement through the facilitation of the admission, transfer, and discharge process and collaborate with the physician and health care team that is involved.
- Uses critical thinking skills to effectively advise and direct health care providers in their delivery of patient care while maximizing the efficient use of resources

PROFESSIONAL PROJECTS

Rapid Improvement Event (2015)

- Rapid Improvement Event for contaminated blood culture specimens obtained in the emergency department.

Standard Process of Obtaining Blood Cultures (2015 - 2016)
